...Nutritional solutions for difficult problems

MOJO-EQ PASTE

**A DIETARY SUPPLEMENT FOR EQUINE ATHLETES FOR USE
PRIOR TO STRENUOUS EXERCISE**

Don't lose the race before the start:
USE **MOJO-Eq**

MOJO-Eq PASTE is a pre-race supplement that reduces negative effects on vital organs during strenuous exercise while providing a calming effect on the athlete without compromising the "competitive edge". Horses experience variable levels of physical and mental stress while competing in sporting events, such as racing, resulting in pressure on the blood vessels and lungs and reduced performance.

MOJO-Eq PASTE provides support to the important cardiac and pulmonary systems while also providing a calming effect during strenuous competition by racehorses and other equine athletes.

MOJO-Eq PASTE with Calcium Gluconate, L-Arginine, Thiamine HCL, Magnesium Gluconate, Methylcobalamin (source of Vitamin B1), Magnesium Gluconate and Botanical Extracts in a convenient-to-use paste tube ideal for pre-competition.

MOJO-Eq PASTE contains no ingredients known to be in violation of rules associated with The Jockey Club or FEI.

Directions For Use: Administer 30 ml (one tube) on the back of the tongue 4 to 6 hours prior to the event. Repeat at 2 to 3 hours in very difficult situations.

MOJO-EQ PASTE

MOJO-EQ Paste might be just what you are looking for pre-race to settle nervous horses but that isn't all it does. At a time when we are attempting to reduce the amount of drugs being used, **MOJO-Eq** can help you prepare your horses to perform at peak levels improving their chances to win. Take some of guesswork out of training using natural ingredients proven effective at the track.

MOJO-EQ Paste contains anti-oxidants, essential nutrients and vitamins combined with additional botanical extracts known to improve circulation, reduce inflammation and improve overall condition and attitude.

MOJO-EQ Paste is a one of a kind, economical and easy to use natural supplement that doesn't contain any ingredients restricted by racing regulators. What more could you want?

Many very talented horses fail to perform to their ability because of nervousness, washing out, bleeding and pain. Help can be in your hands with **MOJO-EQ Paste**.

*"I heard about **MOJO** from a veterinary surgeon who is a friend of mine. He told me that it had enjoyed success in Europe with horses who were bad in the gate, and this fit a 3y/o f of mine to a "T." She had shown promise as a 2yo but her 3 y/o career had been compromised by bad gate behavior. She was also barely manageable in the paddock, as was her mother before her. She schooled very willingly in the morning at the gates, but in the afternoon she became unglued. Gate crews would "tail" her and grab her ear, perhaps, almost as unpleasant for her trainer as it was for her. With the use of **MOJO**, not only was she considerably improved in the paddock, she was also well mannered in the gates. She finished 2nd that day to a 7-5 favorite who won her fourth in a row, and won a 100k stake in her next race. I recommend this product to trainers with problem paddock horses and horses who are habitually uncompromising at the gate. **Get your MOJO working!!**"*

*"I have another 3 y/o filly from a good family, who has been hardly manageable in the paddock and truly rotten in the post parade in front of the grandstand. It's embarrassing when one of your horses starts bucking in the post parade after coming through the tunnel at Churchill and drops the rider. This filly always goes to the front and seldom hangs on for a win. With Mojo, she was much better behaved in the paddock, and fairly settled in the post parade. But most encouraging, she sat in third down the backside, engaged the leader at the quarter pole, and dueled to the wire, only to lose by a head. You'd have to say, her **MOJO was working!!**"*

Mark Hubleby Thoroughbred Trainer, Lexington, Kentucky

*"I have recently heard about **MOJO** from friends and all I can say is: Where do I get some?"*

Tim Keefe, Thoroughbred Trainer, Laurel, Md.
