SOOO CALM

KEEP YOUR HORSE
CALM, COOL & COLLECTED

SOOO CALM in an easy to use paste formula helps reduce stress and improve performance by your horse or pony.

Horses can misbehave or “wash out” due to nervousness or stress prior to and during competition and training. **SOOO CALM** contains the highest quality ingredients, some associated with serotonin production, to calm your horse to improve concentration without reducing the “edge” necessary for successful competition.

Some horses tend to be “high strung” and difficult to handle leading to difficulty focusing on the work at hand resulting in problems with training. This is particularly true with young horses in the early stages of their training. **SOOO CALM** can help you make stressful new situations pleasant situations for both horse and rider.

SOOO CALM contains no ingredients known to be in violation of rules associated with either The Jockey Club or FEI.

SOOO CALM ingredients include: Ca Gluconate, Botanical Extracts, Thiamine Hydrochloride and Magnesium Gluconate.

Directions for Use: Administer 10 ml 2 hours prior to exercise or event into the horse’s mouth on the back of the tongue. Can be repeated as needed.

*“I have a mare that has been on the farm for years and she is very skittish. We were concerned about her behavior when we took her to the Keeneland Auction. **SOOO CALM** was the answer to our problem. After we gave her **SOOO CALM** she went through the ring without any problem. It’s nice that the product is natural and can be given to pregnant mares without worry. My big concern was that she would get worked up at the sale and lose the foal. With **SOOO CALM** she stayed, well...calm and cool.”* Edmond Hogan Gaulstown Stud, Kentucky

*“**SOOO CALM** is great for keeping my show horses calm and focused. I love it.”* Carol McCarthy, Show Horse Trainer and Bloodstock Agent, Apopka, FL.
